Work Experience

🔘 **Deloitte Consulting India Private Limited** as Business Technology Analyst
Aug 2018 to Till Date

Backend developer, development of restful services using spring boot technology, SQL, and no SQL databases, IntelliJ idea, eclipse, gradle, maven.

    Analyzed user stories updated by product management team in JIRA and came up with Acceptance Criteria before the start of the iteration
    Understood Business Requirements from the onsite team and co-ordinated with offshore team for development of the same
    Performed Test Driven Development based on the acceptance criteria for the user story and delivered the same to QA at the end of iteration
    Used JUnit to write unit test cases even before writing the actual code making the test cases fail initially and then added minimum code to make the test cases pass. Ensured refactoring of the code until the code is as per standards. This approach is called the Red Green Refactor approach
    Used Mockito to mock the DAO calls for testing our service and helper classes
    Attended daily standup to update the progress of the story
    Participated in showcasing demo to the business users at the end of each iteration
    Refactored code to maintain code standards by looking at the SONAR score for the project and also added more JUnit test cases to improve test coverage for the project. SONAR is integrated as a plugin on Jenkins
    Participated in Iteration retrospective at the end of each iteration to assess failure points and areas of improvement
    Provided bug fix for defects identified in QA and fix the same and did proper lifecycle management for the defect
    Individual contributor towards the development of Restful API Services and underlying business logic
    Designed and Implemented the API designs and database structure
    Created Spring Boot based RESTful web services and deployed the same to PCF to expose our data to other systems and we used JSON as our data exchange format

- **Capiot software private limited** as Associate Consultant
  Nov 2017 to Jul 2018

  * Contributed towards the development of Restful API Services and underlying business logic
  * Implemented login functionality using Oauth2.0
  * Organized necessary technical documentation
  * Completed and established proper unit tests
  * Worked on bug fixing and improved application performance

- **Soulstice Software Solutions Private Limited** as Mid-level Java developer
  Apr 2016 to Nov 2017

  * Established API for Flip Kids such as login, registration and so on
  * Individually contributed towards the development of Restful API Services and underlying business logic
  * Organized necessary technical documentation
  * Completed and established proper unit tests
  * Worked on bug fixing and improved application performance
