Work Experience

◉ **Capgemini** as Business Analyst
Feb 2019 to Till Date

Nordea is a European financial services group operating in northern Europe and based in Helsinki, Finland. Nordea serves 9.3 million private and 530,000 active corporate customers, including 2,650 large corporates and institutions. Analyzing data provided by client and providing root cause of the issue.
Fixing defects in design by suggesting minor code changes for priority issues with required test results or by creating change request and sending it to the appropriate team with root cause of defect.
Creating data patch to insert new records and closing old records.
Automating code to increase the efficiency.
Handling changes in multiple semantic layers like FATCA, GSIB, CPS, SPM etc., and providing impact assessment for the new deployments.
Analyzing job aborts during executions and providing root cause.
Validating data after data loads and analyzing it if there is any unusual deviation in data
Developed a system to analyze different scenarios and create a report accordingly. Those scenarios include gender wise classification, occupation wise classification, occupation type wise classification, classification according to literacy, mode of transportation etc., We have used Ab intio as ETL tool and excel as the database since we didn't have access to other database during our training. We have used Qlikview and Qlik sense as reporting tools.
