Summary

Expertise in Project Management activities, encompassing planning, design, scope definition, estimation, resource administration, process management and compliance with quality standards; ensuring project delivery within time, cost and quality specifications of product/software application

  Presently working as a Project Manager for a pharmaceutical company and managing building of ETL pipeline across all phases of development at Cognizant, Sanofi, Bridgewater, New Jersey

  Experience in Hadoop Components - HIVE, Sqoop and Apache Spark

  Collaborated with stakeholders for managing multiple projects directed towards achieving strategic business & other organizational objectives; identified opportunity areas; piloted process improvements by identifying gaps

Work Experience

◉ **Cognizant** as Project Manager
Dec 2019 to Aug 2020

  Client: (Pharmaceutical Company Headquartered In Paris, France)

  At Cognizant
    Project 1: Develop a scalable, fault tolerant data pipeline in a Hadoop Environment for event management for HCP (Health Care Professional) reporting in order to meet the regulatory requirements
    Project 2: Develop a new workflow to aggregate Sales feed & product feed from IQMA on Monthly basis
    Project 3: Design and Development of routines to share the following data feeds to Sanofi outbound MFT server

  As Data Engineering Trainee
  Jul'19-Nov19 Platform by Per Scholas, Internship sponsored by Cognizant
    Project 1: 'Health Insurance Marketplace' files contain the data on health and dental plan offered to individuals and small business through the US Health Insurance Marketplace
  o   Created an ETL workflow for Health Insurance Marketplace Dataset
  o   Extracted unstructured data from website using request library in python, Spark to store in mongoDB
  o   Visualized final dataset using pymongo connector and matplotlib library
  o   Extracted, transformed and manipulated data using the following tools: Apache Hive, Apache Sqoop

    Project 2: Sparkify is a music streaming startup with a growing user base and song database. Their user activity and songs metadata data resides in json files in S3
  o   Built an ETL pipeline that extracts their data from S3, stages them in Redshift, and transforms data into a set of dimensional tables for their analytics team to continue finding insights in what songs their users are listening to

◉ **Cognizant** as Project Manager
Nov 2019 to Till Date

◉ **Tata Trust** as Data Analyst & Project Manager - Office of Secretary of State
Nov 2018 to May 2019

Nov 2018 to May 2019

Poshan Abhiyaan, a central government initiative that focuses on reducing stunting, under-nutrition and anemia in women and adolescents
o   Worked as a Data Analyst for the state of Rajasthan, India to identify key insight on the progress of the state health initiative with pregnant women and children below 5 years of age
o   Performed data analysis, data cleaning & data validation of collected data of the service & giveaways being offered in Anganwadi Center (Community Center); validated data and purged invalid/bad data
o   Presented information, i.e. data stories to the state officials and principal secretary
o   Spoke to all Swasth Bharat Prerak (SBP) regularly regarding challenges arising in each district and devised a solution, also coordinated with state officials regarding the challenges
