Associate seeking roles in Software Development,System Programming,Application Development,Project Management,Agile Methodology,Web Development,Quality Assurance,Workflow Analysis,Report Generation,HTML,SQL Server,JavaScript,JQuery,LINQ,AJAX

Current Designation: **Associate - IT**

Current Company: **Cognizant Technology Solutions**

Current Location: **Chennai**

Pref. Location: **Bengaluru / Bangalore,Chennai,Hyderabad**

Functional Area: **IT Software - Application Programming / Maintenance**

Role: **Software Developer**

Industry: **IT-Software/Software Services**

Marital Status: **Married**

Key Skills: Associate,Software Developer,Software Development,System Programming,Application Development,Project Management,Agile Methodology,Web Development,Quality Assurance,Workflow Analysis,Report Generation,HTML,SQL Server,JavaScript,JQuery,LINQ,AJAX

Verified : **Phone Number |** **Email - id**

Total Experience: **7 Year(s) 0 Month(s)**

Notice Period: **15 Days or less**

Highest Degree: **B.Tech/B.E. [Computers]**

Last Active: 22-Jan-21   Last Modified: 22-Jan-21

Summary

*   Have 7.4 years of .Net Framework experience in Designing, Development and Maintenance of 3-tier Enterprise Web Application & Windows Application.
*   Good Knowledge on SQL, MVC, C# and ASP.Net.
*   Design and develop quality Web Front End and WCF/ Web API Applications. Implement custom workflow solutions & reports to enable business requirements
*   Proficient in developing systems built on SQL Server using Tables, Triggers, Views and Stored Procedures in SQL and maintaining the database, including requirement analysis, design, data conversion, loading and implementation
*   Experience on Web API 2 to create HTTP REST services to communicate with UI.
*   Very strong in web development which includes ASP.NET (4.5 / 4.6), ASP.NET MVC (4.0 / 5.0), HTML, HTML 5, CSS.
*   Strong in services development and hosting for WCF, ASP.NET Web API
*   Good knowledge or working experience in Agile projects

Work Experience

Cognizant Technology Solutions as Associate - IT
Dec 2018 to Till Date

Environment: V.S.2017, SQL Server 2014, Windows App, C#, MVC, ASP.NET

Project # 01 Chubb Insurance - Xcelerate

Xcelerate is completely a set of Underwriter Application where Underwriter will validate, register and renew an Insurance policy. Xcelerate has 11 Underwriter applications where each application involves different set of Property & Casualty coverage's. It makes use of various web services and Interfaces. We developed a Windows and Web Application for these products.
Below are the modules in these products:
Load from Genius (legacy mainframe system).
Rating
Quote / Bind letter generation
Registering to Legacy system
In addition, we developed an enterprise solution for implementing common features for all these applications and proxy server to fetch data's to windows application from some of the web application. We are using SSRS for generating Reports

for each application.
Involved in Requirement Analysis, Estimation preparation.
Preparing Design documents and Unit test case documents.
Involved in coding and database related development.
Provided SIT and UAT support.

Rain Industries Ltd as Senior Programmer- Data Management Analyst
Dec 2017 to Nov 2018

Project # 01 CSG Portal.

"CSG has the mission of supporting with data science all the decision making processes of Rain Carbon Inc. as a global leader and innovator in the production of raw materials critical to users of carbon products worldwide."
This portal is used for prediction of demand and tracking of vessels and extraction of news, Maintenance of all Customers, Suppliers and Competitors related data and Finance module for scenario management.
*   Requirement gathering and Understanding of Business process / requirement and converting into the technical specification.
*   Developing T-SQL stored procedures, functions, triggers, views.
*   Optimizing SQL Server performance, monitoring and queries tuning using Microsoft tools Performance Monitor.
*   Data Visualization using Telerik KendoUI.
*   Executing full software development cycle and infrastructure setup
*   Microsoft Azure AD integration.
*   Coordinating the people, resources and processes required to deliver the goal.
*   DB design for dimensional model.
*   Providing necessary support for installing the necessary software's (IIS/.Net/VS/PBI.etc) in cloud servers.
*   Development the portal using C#.net MVC, JQuery and SQL as per the requirement.
*   Providing necessary support for SAP Data automation.
*   Automation of data extraction using R and integration with DB

Greentech Industries India Pvt.Ltd as Software Engineer - Developer
Aug 2013 to Nov 2017

Client: Greentech Industries (India) Pvt. Ltd. has been at the forefront of the Indian automobile industry's anti-pollution efforts by introducing spares in engines. It is a Foundry and Machine shop with the latest equipment from advanced countries and managed by experienced engineers from Taiwan & China that ensure the quality of the casting products to be of top grade

Role - Developer
Environment: V.S.2010, SQL Server 2012, C#, MVC, ASP.NET

Project # 01 Gauge Management System (GMS)

Gauge Management System is powerful gauge calibration software that will save the time while increasing the accuracy of gauge management and measurement systems analysis. It allows maintaining a complete history of measurement devices, instruments, and gauges. To ensure timely calibration, Schedules and Reports
*   Understanding the modules, and integrating the modules.
*   Responsible for gathering requirements, getting sign-off from the business users and prepare system requirements specification for the solution
*   Involved in coding and designing of the web forms
*   Developed Complex MVC Controller, View Models and helper methods linked to database.
*   Deployment of web services in the web pages.
*   Develop Crystal Reports, ASP.NET MVC4, VB.NET, MS SQL Server 2012, and Visual Studio 2012.
*   Validated web forms through JavaScript and JQuery.
*   Designed database in MS SQL Server by creating Tables, Stored Procedures, Functions, Views and Triggers and integrate them in the applications.
*   Designing User Interface in Silverlight better Performance in Client browser and Procedures. WCF using distributed communication transactions to the database.
Project # 02 HRMS

HRMS is an HRM information system that provides a vast range of features to manage the crucial organization asset - people. Time management keeps track of various activities performed daily which include retrieving in-out movement data of employees, processing leaves, on-duty, and compensations. The project is divided into following modules.
The core module maintains all relevant employee related information. Time and Attendance Module automates time tracking related processes. The offered functionality enhances the organization's performance by eliminating paperwork and manual processes associated with time and attendance needs a comprehensive leave management module, with extensive possibilities of defining leaves types and more.
*   Designing and Development of GUI screens using HTML and .Net
*   Involved in coding and designing of the web forms
*   Involved in creating reports
*   Developed applications leveraging ADO.NET, Entity Framework
*   Involved in Unit Testing.

Education

UG: **B.Tech/B.E. (Computers)** from **William Carey University** in **2010**
