Projects

Project Title: OHS Connect
Client: Birla Corporation
Nature of Employment: Full Time
Role: Programmer

Duration: Jan 2020 - Apr 2020
Onsite / Offsite: Offsite
Team Size: 5

Skill Used: Web Api, Sql server, Html
Role Description: My role is to develop incident report module and also provide training for all HOD's, UH and engineers including safety department.
Project Details: Main goal of this application is to improve the safety standards for all types of employees or labour working for birla directly or indirectly. This application is built for the safety department of birla corporation by using this application, they can keep records of unsafe observation reported in any of the birla plant and also they track any types of incidents happened inside birla plant. Once observation or incident is reported HOD or UH (unit head) will form a team for further investigation. Team will investigate the report submitted by safety department and assign a responsible person and submit their report . Responsible person can take all necessary steps so reported observation or incidents should not happen in coming future. This application also Include other modules like Safety training, safety department Meetings and audit.

Project Title: ZIEP (Zinc Innovation And Excellence Portal)
Client: Vedanta
Nature of Employment: Full Time
Role: Programmer

Duration: Aug 2019 - Dec 2019
Onsite / Offsite: Onsite
Team Size: 2

Skill Used: Asp.net, 3 layerd Architecture, MS sql server
Role Description: My role is to develop complete application including database, unit testing, taking new requirements from client , giving demo and deployment on production server.
Project Details: In this application user can create a team according to vertical and unit , each unit having multiple teams and those teams having a team lead and multiple team members including different types of approvers. User can assign project to the team and leader will provide specific deadlines for different phases of projects, each phases having multiple numbers of approvers and these approvers will review the progress report submitted by leader and pass their comments for next phase and same flow will continue till final phase.

Project Title: T&E (Travel & Expense)
Client: Essel Group

Project Location: Bangalore
Role: Programmer

Duration: Apr 2019 - Jun 2019
Onsite / Offsite: Offsite
Team Size: 3

Skill Used: Asp. net, 3 layerd Architecture, MS Sql Server
Role Description: My role is to develop expense claim module in which user can raise different types of claim.
Project Details: Main functionality of this application is to book tickets for all types of business travel and also employees can claim whatever the expense has been done like Mobile, Local transportation, accomodation, tickets expenses. Once claim request has done then request will go for the further approval.

Project Title: CD_SPEC (Capacitor Design Specification)
Client: ABB Industries
Nature of Employment: Full Time
Project Location: Bangalore
Role: Programmer

Duration: Dec 2018 - Mar 2019
Onsite / Offsite: Offsite
Team Size: 3

Skill Used: ASP.Net, SQL Server, C#, .NET Framework, HTML, CSS, Javascript, JQuery, Bootstrap
Role Description: Software Developer(Trainee): I develop web application based on clients requirement I am instructed by team leader and project manager as well. I am also involved in gathering requirement from client and also showing demo with the progress.
Project Details: Project Title: ABB CD Spec(Capacitor design specification)
This application is build for ABB to keep track of the specifications of the capacitors that are designed by ABB for clients all over the globe. Designing a capacitor involves different segments like canning, bushing and many others and this application helps in keeping a track of all the records so that they can use this records in future as a reference. Majorly it keeps track of 1st phase capacitor and 3 phase capacitors. It also helps in designing a capacitor based on certain inputs. Based on inputs, many fields has to get calculated the values automatically so that the specifications and values can be more precise. The application is build in such a way that when an admin logs in he gets the privilege to add employee who can access this application and who can design a capacitor.
Tools and Technologies : Asp.net , HTML5, CSS , Bootstrap , Jquery , Ms Sql Server
