Associate System Engineer seeking roles in Software Design,Software Development,Requirement Gathering,Integration Testing,Unit Testing,Coding & Testing,Technical Support,Software Development Life Cycle,Functional Specifications,Java,MySQL

Current Designation: **Associate System Engineer**

Current Company: Iris Software Technologies Pvt. Ltd

Current Location: **Noida**

Pref. Location: Jaipur,Delhi / NCR,Chandigarh

Functional Area: IT Software - Application Programming / Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Single/unmarried

Key Skills: associate system engineer,software design,software development,integration testing,unit testing,coding & testing,technical support,software development life cycle,functional specifications,java,mysql

Verified :   Phone Number | Email - id

Total Experience: 0 Year(s) 11 Month(s)

Notice Period: 15 Days or less

Highest Degree:

Last Active: 21-Jan-21   Last Modified: 21-Jan-21

Summary

B.Tech.(Computer Science) professional with 11 months of experience in Software Development in Agile Environment
    Currently associated with Iris Software Technologies Pvt. Ltd., Noida as Associate System Engineer
    Gained experience in developing applications using Object Oriented Analysis, Design and Programming (OOPS)
    Technical expertise entails JAVA, J2EE, Angular 8 ,HTML, Python and MySQL
    Strong exposure of working on Oracle in writing SQL statements and creating Stored Procedures
    Hands-on knowledge of working with Github & Git CLI commands to maintain CI cycle
    Understanding of Software Development Lifecycle (SDLC) right from requirement analysis, documentation (functional specifications, technical design), coding and testing (preparation of test cases along with implementation) to maintenance of proposed applications

Work Experience

Iris Software Technologies Pvt. Ltd as Associate System Engineer
Sep 2019 to Till Date

Key Result Areas:
    Working with stakeholders across the organization to gather requirements for new systems and reports
    Utilizing existing structure to transfer ticket categories and group names to the new system structure
    Collaborating with Quality Assurance Team to help them develop and execute automated test scripts, using the provided automation framework
    Supporting clients in a cross-functional environment, performing analysis based on requirements analysis and technical evaluation
    Developing software solutions by studying information needs, conferring with users, studying systems flow, data usage and work processes
    Liaising with users for requirement gathering; preparing functional specifications and low-level design documents
    Managing the maintenance of program modules including operational support, problem resolution, production support, preventative and corrective maintenance and enhancements
    Assisting in determining operational feasibility through analysis, problem definition, requirement analysis and proposing solutions
    Documenting software solutions through flowcharts, layouts, diagrams, charts, code comments and clear code
    Formulating solutions for given technical specifications; installing application software and deployed customizations; contributing to code reviews
    Constructing and executing unit/basic/functional test cases and framework

Testing modules developed by self & the team to ensure that these are as per desired quality standards; writing test specifications and conducting tests
Providing third level incident escalation support to the Technical Support Group for customization problems
Contributing to software improvements (products, processes, methods, tools), designing inspection and code review.
Participating in requirements gathering for enhancements and creating high-level as well as detailed-level design documents

Education

UG: **B.Tech/B.E. (Computers)** from **Uttar Pradesh Technical University (UPTU)** in **2019**

PG: **in 0**

Other Qualifications/Certifications/Programs:
NASSCOM Certificate for completion of java
