Software Engineer seeking roles in Software Engineering,Software Development,Project Management,Change Management,Data Management,System Administration,Requirement Gathering,Application Support,JavaScript,Jenkins,Eclipse,Oracle,MySQL,HTML,CSS,XML

Current Location: Mumbai

Pref. Location: Hyderabad,Mumbai,Pune

Functional Area: IT Software - Application Programming / Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Single/unmarried

Total Experience: 8 Year(s) 0 Month(s)

Notice Period: 15 Days or less

Highest Degree: B.Tech/B.E. [Computers]

Key Skills: Software Engineer/Developer,Software Engineering,Software Development,Project Management,Change Management,Data Management,System Administration,Requirement Gathering,Application Support,JavaScript,Jenkins,Eclipse,Oracle,MySQL,HTML,CSS,XML

Verified :   Phone Number | Email - id

Last Active: 21-Jan-21   Last Modified: 21-Jan-21

Summary

Client-centered, project-oriented software professional with 7.6 years of technical and functional experience in Product Life Cycle Management (PLM) and Supply Chain Management (SCM). Competency in project management, data management, change management, system administration, customization, testing, maintenance and support.

Work Experience

Accenture India as Software Engineer
Feb 2013 to Aug 2020

Project Profile:
Client : Roche UK (July 2019 - July 2020)
Development and support of Windchill 11.1
Key Responsibilities :
Business Administration :
Change management, promotion request and change objects in windchill
Configuration of product , libraries for dynamic documents
Creating user accounts, groups and ACLs
Preference management configuration
System Administration
Performing system administration tasks which includes managing services and optimizing components for better performance in windchill
Monitor and manage UNIX servers in windchill and maintaining their performance with no unplanned downtime
Workflow Administration :
Managing and creating new life cycles, workflows, teams
Configuration of ACLs
Reassigning the lifecycle of change requests to the latest iteration of workflow
Maintenance and support :
Addressing application issues
Duplicating issues, troubleshooting, investigation of technical problems and tracking resolution of those problems in collaboration with other teams
Checking system health and doing preventive maintenance activities
Business Administration :
Configuration of product , libraries, dynamic documents

Configuration of part and document relationship
Creating user accounts, groups and ACLs
Preference management configuration
Administration :
Implementing file vaulting, content replication
Patch upgradation
Created ant script for server maintenance
Installation and configuration of solr index search
Managed and monitored production, test and staging environments for system
performance
Performing system administration tasks which includes managing services and
optimizing components for better performance in windchill
Monitor and manage UNIX servers in windchill and maintaining their performance
with no unplanned downtime
Rehosting test and staging instances as needed
Data migration
Upgrade from windchill 10.2 to windchill 11.0
Workflow Administration :
Managing and creating new life cycles, workflows, teams
Configuring domain policies in windchill
Configuring type and attributes
Configuring ACLs
Maintenance and support :
Problem definition, effort estimation, diagnosis, solution generation
Duplicating issues, troubleshooting, investigation of technical problems and tracking
the resolution
Checking system health and doing preventive maintenance activities
Addressing application issues and respective diagnosis
Business Administration :
Change management, promotion request and change objects in windchill
Configuration of product , libraries
Configuration of part and document relationship
Creating user accounts, groups and ACLs
Preference management configuration
Creating graphical representation tools for worker monitoring
System Administration :
Implementing file vaulting, content replication
System maintenance downtime, build creation and build deployment for windchill
Patch upgradation
Created ant script for server maintenance
Installation and configuration of solr index search
Managed and monitored production, test and staging environments for system
performance
Performing system administration tasks which includes managing services and
optimizing components for better performance in windchill
Monitor and manage UNIX servers in windchill and maintaining their performance
with no unplanned downtime
Rehosting/ refreshing test and dev environments
Workflow Administration :
Managing and creating new life cycles, workflows, teams
Configuring domain policies in Windchill
Configuring type and attributes
Configuring ACLs
Maintenance and support :
Provided Customer centric service by understanding of the issues, knowledge of
PTC products and support processes
Problem definition,effort estimation, diagnosis, solution generation and design and
deployment
Creating software configurations, duplicating issues, troubleshooting, investigation
of technical problems and resolution
Checking system health and doing preventive maintenance activities
Addressing application issues and respective diagnosis

Education

UG: **B.Tech/B.E. (Computers)** from **Thakur College of engineering and Technology mumbai University** in **2012**

IT Skills

Skill Name	Version	Last Used	Experience
C, C++, Core java, HTML, CSS, XML			
MySQL, Oracle,JIRA, Tableau,Informatica,			
Windchill, Big data, Hadoop,Jenkins			

Languages Known

Language	Proficiency	Read	Write	Speak
English				
Hindi				
Marathi				
Gujarati				

Affirmative Action

Physically Challenged: No

Work Authorization

Job Type: Permanent / Temporary

Employment Status: Full Time, Part Time
