Summary

Associate Technical Lead with over 5.5 years of experience in Insurance Domain(Auto, Property, Farm, and Commercial Property) and Guidewire Policy center. Excellent reputation for resolving problems, improving customer satisfaction, and driving overall operational improvements. Proven success in organizational development with a keen understanding of elements of the Insurance business. Recognized for inspiring team members to excel and encouraging creative work environments. Eager to contribute to team success through hard work, attention to detail, and excellent organizational skills.

Work Experience

▣ **Ernst & Young(EY)** as Associate Technical Lead-IT
Nov 2018 to Till Date

Worked with Top Canadian Insurance companies in overall Data migration from Legacy systems to Guidewire, through Procedure's and functions in SQL Server
Collaborated with cross-functional development team members to analyze potential system solutions based on evolving client requirements.
Extensively worked on Policy center for 5 years and well versed with different transactions on a policy and policy cycle.
Worked on converting data from source (linked servers) to target tables using source and intermediate staging tables.
Adroit in IBS legacy system.
Improved system performance by making proactive adjustments and resolving bugs, performed software testing to uncover bugs and troubleshoot issues prior to application launch.
Analyzed the business and functional requirements specifications by connecting with clients on daily basis.
Built procedures for importing data from flat files, product model validations, bulk synonym creation, type list validations, importing data from linked server staging tables.
Managed quality assurance program, internal audits.
Reviewed code and worked with development teams to correct problems, run test scenarios, and prepare for deployment.
Tested troubleshooting methods, devised innovative solutions, and documented resolutions for inclusion in the knowledge base for support team use.

▣ **Tata Consultancy Services** as Senior Software Engineer

Jun 2015 to Oct 2018

Developed mappings that perform Extraction, Transformation and Load of source data into Flat files using various power center transformations like Source Qualifier, Aggregator, Filter, Router, Sequence Generator, Lookup, Joiner, Expression to meet business logic in the mappings and loaded these data into source staging tables, target staging tables, and flat files.
Reusable transformations and Mapplets have been built wherever redundancy is needed and Parameterized hard-coded values.
Experienced at creating effective test data and development through unit test cases to ensure the successful execution of data.
Done peer review of codes to ensure that the Informatica coding standards are followed.
Trained and mentored junior developers and engineers, teaching skills in the insurance domain and working to improve overall team performance.
Debugged and troubleshot on invalid mappings for clients, solving technical issues quickly and accurately
Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs, and enhancements.
