Summary

Working as full-stack developer for Infosys. Innovative optimized solution seeker. Excited to be at the deployment phase of my new career as a web developer.

Work Experience

Infosys as Specialist Programmer -Java
Jul 2018 to Till Date

Achievements/Tasks
Responsible for backend development of Infosys
Modernization Platform.
Trained on Backend technologies Spring boot and
Spring MVC and Forntend technologies in Angular 6.
Working as back-end developer for Infosys Internal
Project. Also providing support to UI team in Angular 6.

PROJECTS
IMP is intended for creating Enterprise web application with
different dependencies and platform easy, with features where
we can select different language, framework, databases.
Designed and developed several servers side REST API's using
spring boot framework.
Collaborated with front end engineers for integration of REST
endpoints with UI. Also created Excel parser in Angular 6 to
retrieve data from excel.
Drove new and innovative solutions to meet business needs.

Shopping Cart Application (09/2018 - 12/2018)
E-Kart is e-commerce application intended for online retailers
with common features like product search, signup, login,
cancellation, return, rating, wish-list, cart and notification.

Designed and developed several server side REST API's using
spring micro-services framework.
Improved user experience and added new functionalities few
of them are: product rating, seller rating, cancelation of order,
return of orders.
Improved responsiveness by creating multiple micro services
and using load balancing.

Visitor Management System (06/2018 - 09/2018)
Visitor Management System is aimed at providing seamless,
secure and effortless entry/exit into Infosys campus.
Designed and developed several server side REST API's using
spring boot.
Worked closely with front-end team for integration of front end
elements with backend services.
