Work Experience

▪ **Mentis Inc** as Associate Product Manager
Jun 2019 to Till Date

I designed and developed an Artificial Intelligence based application and helped the organization to acquire new customers

▪ **MENTIS Inc** as Project Lead - Customer Success
Jun 2019 to Oct 2020

Product Management
    Designed and developed a Machine Learning/Natural Language Processing based application to anonymize sensitive data in semi structured and unstructured files.
    Designed and developed an enterprise scale, cost efficient automatic tool for training Machine Language models
    Designed and developed various product features which the company can sell in its 'premium suite' of products.
    Create and maintain product roadmaps and release cycles
    Communicate Project Management teams of upcoming innovations & releases and help Sales team on messaging and sales strategy. Also provide research & analysis to aid sales efforts, enable marketing messages and provide inputs for press releases
Marketing and Sales
    Lead in Pre-Sales, Product Demonstration and designing & managing Proof of Concepts.
Customer Success
    Responsible for end-to-end project management and software delivery, using established project management methodologies to execute projects within budget, to effectively allocate resources to optimize business results, and to provide accurate forecasts and budget spending
    Proactively manage communications among external stakeholders - customers and partners - as well as internal stakeholders - Product Management team, Customer Support team, Quality team and Development team - involved in the implementation/development process
Training
    Responsible for restructuring product training of MENTIS.

Provide coaching, mentoring, and training for project team and peers
Train clients to educate them regarding products

- **Live Project** as Consultant
Jun 2018 to Sep 2018

International Business Practises - Visited Singapore to consult 'Digileap' to help them develop software (Artificial Intelligence + Robotic Process Automation) products that automate various Banking & Insurance processes.
    Responsible for gathering critical information by conducting interviews and use that data in evaluating existing Banking & Insurance business processes, anticipating requirements of automation in Insurance sector, uncovering areas that can be improved by automation, understanding current capability and maturity of AI & RPA and assessing cost and price of the automation product.
    Devised a new process flow for Banking and Insurance operations that fully utilizes current automation tools to deliver a fast, efficient, accurate and cost-effective process.

- **Tata Consultancy Services Ltd** as System Engineer
Sep 2013 to Jul 2017

Develop various solutions and 'Proof of Concepts' involving cutting-edge technologies like the Internet of Things, Cloud computing, Hardware and OS virtualization, API management, Hybrid Processing, MQ etc.
    The white papers developed on the above technologies were presented in various national and international conferences like IBM INTERCONNECT (Las Vegas, 2015 & 2016), SUSECON (Amsterdam, 2015) and CICS Conference etc.
    Received 'Technical Excellence Award' and 'Service and Commitment Award'.
