Work Experience

Infosys as Technology Analyst - Frontend Developer
Oct 2013 to Nov 2020

Wingspan (internally called Lex) is a gamified talent reskilling platform that helps organizations accelerate their talent transformation journey. Involved in working on Authoring tool and end to end development of a tool with following features:
1. A tool (channel editor) in wingspan, with plugin type architecture to inject whichever component is required, will be injected dynamically into the view.
2. It enables users to create responsive microsites/web pages without having technical knowledge of HTML CSS or JS that can be made available on platform once finished and published by user. It is a tool equipped with number of widgets to make use of in-house page framework, a component Library using Angular, to provide responsive design and styles consistent with the application's designs and styles.
3. 20+ widgets for editor and page framework, to enhance user experience and brought simplicity & ease to help users for creating complicated designs, using angular material to keep design and style consistent.
4. Reduced the design time of pages by ~50% by using an in-house page framework and converting them to widgets that can be easily used by users on tool that helped build ~200 custom dynamic pages for different clients and units.
5. Worked on different authoring tools (course, Module, collections etc.) available in application to

enable users to create content on platform.
* Collaborated with back-end developers and web designers to improve usability
Created quality mock-ups and prototypes.
* Worked collaboratively with other designers to ensure a consistent, integrated brand perception and userexperience.
