Senior Java Developer seeking roles in Software Development,Scope Management,Requirement Gathering,User Acceptance Testing,Quality Management,Risk Analysis,Cost Estimation,Functional Specifications,Coding & Testing,SLA Management,Core Java

Current Designation: **Senior Java Developer**

Current Company: **Mercedes Benz India**

Current Location: **Bengaluru / Bangalore**

Pref. Location: **Bengaluru / Bangalore**

Functional Area: **IT Software - Application Programming / Maintenance**

Role: **Software Developer**

Industry: **IT-Software/Software Services**

Marital Status: **Married**

Key Skills: Senior Java Developer,Software Developer,Software Development,Scope Management,Requirement Gathering,User Acceptance Testing,Quality Management,Risk Analysis,Cost Estimation,Functional Specifications,Coding & Testing,SLA Management,Core Java

Total Experience: **10 Year(s) 0 Month(s)**

Notice Period: **1 Month**

Highest Degree: **Medical-MS/MD [Computer Science]**

Verified : **Phone Number |** **Email - id**

Last Active: **Jan-Mar 2021** Last Modified: **Jan-Mar 2021**

Summary

* A Java professional with over 10 years of experience in Software Development & Programming on Java Environment and Development of web applications using JAVA / J2EE technologies
* Expertise in concepts of end-to-end project planning & implementation including scope management, activity sequencing, cost estimation, risk analysis, and quality management
* Expertise in mapping clients' business requirements & translating these requirements into functional specifications, custom designing solutions (process / product)
* Proven success in identifying test scenarios, develop test scripts, and execute User Acceptance Testing (UAT); Proficient in developing & debugging challenging requirements under time constraints alongside communicating & collaborating with cross-functional teams
* Worked on projects involving Core Java, IBM WebSphere MQ, Oracle, Unix Solaris, IBM WebSphere application server, JBoss EAP, PLSQL packages, J2EE and Web Services

Work Experience

Mercedes Benz India as Senior Java Developer
Feb 2019 to Till Date

Organization: Mercedes Benz India

Project Title: Platform Development & Services
Client Name: Daimler AG, GERMANY
Period: Feb'19-Till Date
Role: Senior Java developer
Description: The platform built with modules such as Authentication, Authorization, and Directory access. It is developed for multiple application servers (JBoss, Tomcat and IBM WAS). It provides the PING services to the customers so that they can deploy the applications in the platform and use the API or PING functionalities. The features employed in the project are:
o   OAuth scopes
o   Access, Revoke and Refresh token
o   Login/logout
o   Client credentials flow
o   Introspection

o   Userinfo endpoint
o   Automated installer for solution installation

Mphasis as Senior Java Developer & Tech. Lead
Jun 2010 to Feb 2019

Organization: Mphasis, an HP company

Project Title: Account Validation System
Period: Nov'10-Feb'19
Role: Senior Java developer
Description: It is an application built on J2EE platform. It is developed as a middleware between the applications on different platform. It provides the services to the requesting systems and get the accurate data from the billing systems. The application is platform independent and expandable.

Project Title: WRAPS
Period: Nov'10-Feb'19
Role: UNIX and Database Enhancement
Description: The application that records all the claim and keep a track of status of the claims done. It generates reports for the customer on weekly basis. It has the front-end application for client and at the back-end, we have database and cron jobs running on the UNIX host.

Project Title: INFOTRANZ
Period: Nov'10-Feb'19
Role: UNIX, Java development and SQL Procedure Development
Description: This is an application mainly concerned with advising the service providers with all the utilities associated with every FNN and processing through every billing system. It gathers all the information regarding the status and sends the notifications to the service providers every day. It has front-end for client and at the back-end we have database and cron jobs running on the UNIX host. A Java application required to be developed which will fetch the valid the service numbers from the database and build a SOAP message. The message needs to be placed into queue via SOAP over JMS. Another Java application needs to be developed which will map the request- response message. It will pick the message from response queue and parse the xml message received and updated the database. The both Request and response application has been developed. There are executed in UNIX host via scheduled cron job.

Education

UG: **B.Tech/B.E. (Computers)** from **Visveswaraiah Technological University (VTU)** in **2009**

PG: **Medical-MS/MD (Computer Science)** from **christ University** in **2011**

Other Qualifications/Certifications/Programs:

MBA in Finance
