# Work Experience

🔘 **Infosys Technologies Ltd.** as Technology Lead
Jul 2010 to Till Date

PROJECT DESCRIPTION - CMA CGM

\*    CMA CGM is the 4th largest Shipping company in the world. I am working as a Business Analyst for the core IT services which is responsible for building the new IT systems and maintaining the legacy system.
.
Responsibilities:-

\*    Requirement discussion with Product Owners.
\*    Analysis of the requirement , coordinating meeting/sessions with different IT stakeholders like Architects,UI Designers,developers,testers to propose an IT solution.
\*    Form a scrum team to work on requirement following the agile principle.
\*    Acted as Scrum master to enforce scrum principles are rigorously followed.
\*    Planning of review and retrospective meetings with Scrum team after every sprint.
\*    Testing the functionality as a Business analyst to ensure development is aligned with the requirement given.
\*    Facilitating UAT with product owner.
\*    Performing regression testing to ensure there is no impact to any existing functionality.
\*    Finally delivering the requirement to production on go-live date and providing post production support.

PROJECT DESCRIPTION - GEM

\*    Global Equipment Management (GEM) WAS a Replacement and Modernization of Legacy Systems (REMODEL) project. REMODEL is a multi-year, business-driven IT transformation initiative to re-architect and build the next generation of information systems. The project transformed the business through more robust and responsive systems and enabled client to capitalize on growth and industry leadership opportunities.

* Global Equipment Management (GEM) project to equip its liner shipping business with added capability and functionality to better maintain its equipment.

Responsibilities:-

* Provided production support to USA users as I was located in USA for onsite support.
* Preparation and delivery of Business requirement document use case to attribute mapping document in requirement phase.
* Preparation and delivery of High level design documents, Detail level design documents and Unit test plan in design phase.
* Development, unit testing and delivery of code for web components, business components and database mapped components for review in build phase.
* Development and scheduling of batch jobs.
* Integration and Testing of external interfaces with the existing system along with the defect fixing in the System Integration Testing phase.
