Work Experience

Tata Consultancy Services as Software Developer
Sep 2016 to Till Date

PROJECT NAME: Chabot (Enterprise UKB Self Help)

DESCRIPTION:
It was a great tool that we have developed for other team in British Telecom, it is type of automation tool, The main objective of this tool is to reduce the developer time while fixing any bug which is reported by user, so earlier the process for fixing bug is that, the bug which is reported by client is assigned by another team to right bug fixing team and developer basically analyse those bug and many times what happened is that there were no issue found after analyzing , the issue is itself by user so for analyzing this minimum 5 to 6 hr time takes including process as well , but this tool do this job within a single minute. This tool automatically analyzed the bug, which is raised by user, and fixes those bug as well.

Technology: Core Java, Spring, Hibernate, JDBC, SQL

Roles and Responsibilities:
Work as Backend Developer
Handled DB connection using hibernates.
Implemented user-defined exception class
