Technical forte is IBM Mainframes in the areas of Software Analysis, Design, Development, Maintenance and support by using Mainframe Technologies like COBOL, JCL, VSAM, DB2, IMS, DYL280.

Co-ordinated projects on Ab Initio with competent coding knowledge.

Lead the teams across geographies by successfully implementing big size projects.
Experienced in Offshore-onshore Operating model.

Involved in technical writing, prepared document of understanding of the Application and Technical Design document.

Strong experience in handling any kind of service requests in current project in short/allocated period of time with consistent delivery as per the client's expectation.

Excellent communication and presentation skills, vibrant development owner and team player. I am also comfortable working both as a team and individual.

Work Experience

🔘 **Tetrasoft** as Senior Software Engineer
Aug 2009 to Apr 2020

🔘 **Tetrasoft** as Senior Software Engineer
Aug 2009 to Apr 2020

Project. 1

Project Name: WGS - Group Enrollment
Client   Well Point
Role   Software Engineer
Organization   Tetrasoft India Pvt Limited, Hyderabad, India
Duration   Aug 2009 to Feb 2015
Team Size   8
Environment
    Languages: COBOL, JCL, VSAM, DYL280
Database: IMS DB, DB2, CICS
Tools: Xpediter, File Manager, Changeman

Project Description
WGS is the application that WellPoint uses to receive and process their National/Large group accounts Eligibility. The project OH-Group Enrollment is to handle the National Accounts Eligibility. The account that has more than 500 members is called as National Account in WellPoint. Each account sends eligibility file to WellPoint for enrollment in different formats (ANSI 834, Hewitt, Fidelity, Custom etc,) through secured FTP and delivers at WellPoint FTP gateway. The Group Tape Process picks up the file from FTP server and places the file on Mainframe. The subsequent jobs

would convert the file into WGS standard format and process the file & loads the membership into WGS. It's an ongoing process. Groups send their eligibility files in frequent intervals that they agreed upon.

Responsibilities
    Support the Project Lead in delivering the tasks to onsite and client
    Allocate and track the tasks given to the developers.
    Preparing Unit test plan
    Participate in impact analysis review and design document reviews
    Coordinate and participate in UTR reviews
    Complete the assigned tasks on time
    Ensure Quality of Deliverables- Components and Documents

Project. 2

Project Name: Arkansas Blue Cross Blue Shield(ARBCBS)
Client   Blue Cross Blue Shield
Role   Onsite Co-Ordinator and Team Lead
Organization   Tetrasoft India Pvt Limited, Hyderabad, India
Duration   Feb 2015 to July 2020 (Worked 4 years 6 months at Client location - LITTLE ROCK, ARKANSAS, USA)
Team Size   7
Environment
    Languages: COBOL, JCL, VSAM
Database: IMS DB, DB2
ETL Tools: Ab Initio
Tools: Debug Tool, File Manager, Endevor
Project Description
ARBCBS is the application that Blue Cross Blue Shield uses to receive and process their Health Advantage(HA), Blue Advantage(BA) and Blue Cross(BC) Membership and Claims. ARBCBS application will support both Self Insured and Fully Insured clients. The MoveIt team picks up the files from vendor locations and places the file on ARBCBS DLZ location. The subsequent jobs would convert the file into a standard format and loads the data into Group, Member and Claims DWH tables.
Responsibilities
    Attend the Meetings with the Clients to understand the Requirements.
    Do extensive Impact Analysis of the existing Abinitio & Cobol - Code/Copy Books/DML/Other Objects to see how we can incorporate the New Code based off of the existing Code.
    Participate in impact analysis review and design document reviews
    Allocate and track the tasks given to the developers.
    Preparing Unit test plan
    Coordinate and participate in UTR reviews
    Complete the assigned tasks on time
    Ensure Quality of Deliverables- Components and Documents
