Application Development Analyst seeking roles in Application Development,Application Maintenance,System Migrations,System Integrations,Reporting,Documentation,Process Enhancement,Business Analysis,Service Delivery,Troubleshooting,Team Building

Current Designation: Application Development Analyst

Current Company: Accenture

Current Location: Bengaluru / Bangalore

Pref. Location: Bengaluru / Bangalore

Functional Area: IT Software - Application Programming / Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Single/unmarried

Key Skills: Software Developer,Application Development,System Migrations,System Integrations,Reporting,Documentation,Process Enhancement,Business Analysis,Service Delivery,informatica,Oracle,SQL,Application Maintenance,Unix,Machine Learning

Total Experience: 3 Year(s) 2 Month(s)

Notice Period: 3 Months

Highest Degree: B.Tech/B.E. [Electronics/Telecommunication]

Verified :   Phone Number | Email - id

Last Active: 20-Jan-21   Last Modified: 20-Jan-21

Summary

A professional with nearly 3 years of experience in Application Design, Development, Maintenance, ETL/ Informatica
Highly skilled IT Professional with experience in implementing pioneering support Projects
Skilled in mapping clients? business requirements and translating these requirements into functional specifications, services, implementations and custom designing solutions
Followed the project life cycle methodology defined under the process framework; ensured that customer deadlines were met within project budgets
Interfaced with clients to identify business problems and develop state-of-the-art solutions aligned with business objectives
Proficient in the creation & maintenance of database/application architecture and standards following best practices
Proficient with Data Quality, Cleansing, Migration and Warehousing activities with an exposure in ETL process design

Work Experience

Accenture as Application Development Analyst
May 2017 to Till Date

Growth Path
Since Jun'19 as Application Development Analyst
May'17 - May'17 as Application Development Associate

Key Result Areas:
Understood process requirements and provided use cases for business, functional & technical requirements
Interacted with users for requirement gathering; prepared functional specifications and low-level design documents
Participated in the Software Development Lifecycle (SDLC) right from requirement analysis, documentation (functional specifications, technical design), coding and testing (preparation of test cases along with implementation) to maintenance of proposed applications
Maintained program modules including operational support, problem resolution, production support, preventative and corrective maintenance and enhancements
Assisted in determining operational feasibility through analysis, problem definition, requirement analysis, and proposing solutions
Loading data from various data sources and reviewing / suggesting suitable improvements in data models; enforcing data modelling standards, best practices in the design
Supporting Application Development projects through leading the conduct of integration tests for all data warehouses

Conducting systems analysis sessions for understanding client business processes as per management standards and coordinating with team for system design implementation

Participating in designing & planning exercises for future third party software roll-outs to remove any bugs or glitches and delivering enhancements as required by the client

Ensuring that data loads were completed within SLA to facilitate effective communication to the business with the required details

Coordinating with the business in understanding the issues and requirements specifications for enhancements

Designing & developing ETL codes for enhancements & data fix

Enhanced modules delivered to production by rewriting and developing new code to improve the efficiency and effectiveness of systems

Writing Structure Query Language scripts for daily maintenance activities, including indexes and tables analyses

Provided third level incident escalation support to the Technical Support Group for customization problems

Participated in the team's agile software development process; developed unit tests and functional/integration tests; supported production deployments of developed solutions

Delivering project to move third party application from UNIX servers to Red Hat Enterprise Linux servers

Worked with product management and engaged internal customers to understand requirements and gather feedback on solutions

Performed analysis, design, verification, demonstration and maintenance of products in a process-driven, team environment

Education

UG: **B.Tech/B.E. (Electronics/Telecommunication)** from **Kallinga Institute of Industrial Technology, Bhubaneswar** in **2017**
