Summary

Have been working for nearly 3.7 years on Web Development, with a diversified exposure in design, development and implementation of web-based applications.
Have coded end-to-end functionalities (Front-end + Back-end) from client to server side, meeting the business requirements.
Have used GIT for Version Control and merging of files and further deployment on environments via Bamboo.
Working in project life cycle methodology like agile, creating estimations for team members and leading scrum meetings periodically within sprints.
Provided leadership to the entire team in managing deliverables, engaging with client and coordinating with onsite team members, thereby reducing dependency between offshore and onsite teams.
Organized various knowledge management activities such as Tech-session, Tech Quiz across teams within the account.

Work Experience

⦿ **Infosys** as Senior System Engineer -Java Fullstack Developer
Jun 2017 to Till Date

Project Experience:
Full stack Web Development in Manufacturing Unit for Client - Daimler AG, working in Mercedes-Benz Financial services account. Involvement in three different projects catering to the same client.

POS (Point of Sales) -Daimler Ag (11/2017 ? 10/2018)
POS application is a web-based application for consumer vehicles which caters to both lease and retail financing types and is used by Dealers across US, Canada and Mexico.
It consolidates various business processes and external systems to provide a single interface for the dealer. Enables identifying prospective customers and offer them credit facility to lease/purchase used/new vehicles.
Role: Requirement gathering, major to minor enhancements, monthly deliverables. Full end to end testing of application. Bug fixing of production issues.
Worked on: Struts, Jsp, CSS, java, JDBC (DB2). Tools
Tool Used: Jira, Gitlab, Visual Source Safe, Beyond Compare

B2C (Credit Application) (11/2018 ? 09/2019)
Objective of MBFS 2.0 is to modernize the existing legacy application, of which we were responsible for modernizing the Credit Application module. Here one can add existing function of business to consumer application like account summary, payment estimator etc. A totally Front end Agile based project with angular 4.
Role: Requirement gathering, participating in daily stand ups with the client, sprint planning, development of individual modules in a two-week sprint, bug fixing and unit testing
Technology Used: Angular 4, Restful web services, Spring Boot
Tools Used: Bamboo, Gitlab, Jira, Confluence.

CIAM CANADA-MBFS 2.0 (10/2019 ? Present)

Objective of the CIAM project was to integrate Business-to-Customers applications consumers into central Identity and Access Management for End Consumer (registration, profile management, authentication). Full stack web development with angular 4 as the front end and Spring Boot as the backend framework

Role: Responsible in developing the backend services and its implementation from scratch by consuming processed data from different systems. Implemented auth2 for securing communications between our application and the central identity system. Developed front end based on requirements using Angular 4. Requirement gathering, daily standups as per agile methodology with the client, involvement in Sprint planning meeting. Understanding of the entire application and giving KT to new team members.

Technology Used: Spring boot, core java, JDBC, Restful Web Services, angular 4, html 5, SCSS.

Tools Used: Jira, Git-hub, Bamboo, Db Visualizer, Confluence

Education

UG: **B.Tech/B.E. (Electrical and Electronics)** from **SRM institute of science and technology, kattankulathur** in **2017**
