Summary

I am a hands-on Software Developer, Project Team Leader and Tech lead with 12 years of experience in application design, development. I have developed web applications using latest versions of Microsoft Visual Studio (Asp.net Core using C#), Angular, JavaScript, JQuery, Typescript, TFS, NodeJs and other products. I have managed multiple development projects from project initiation through implementation.
I am a Development Tech Lead and Team Lead at Cognizant. I provide direction and interaction with the developers' daily tasks and projects, along with the general managerial responsibilities of 3+ direct reports.
Also, I have led daily agile/scrum meetings for client's projects, providing technical direction and decision process for all aspects of application development, security, and infrastructure.

Work Experience

◉ **Cognizant** as Tech Lead (Senior Associate)
Dec 2016 to Till Date

Responsibilities:
Project Estimation:
Understand how the estimation (effort, size etc.) is done at task level in the area of work concerned, measure and report the actual effort against the estimated effort.

Design & Analysis:
Create the HL Design and detailed design document with the support of architects for the assigned scope.
Review all deliverable created by the Developer.
Study nonfunctional requirements and design for NFR as required.
Understand the inter dependencies of the various components in work packages being developed.

Coding:
Develop tier coding, business layer coding, interface development, service development, creation of stored procedures, etc. as applicable for the work package / project.
CTS and customer specific coding standards, guidelines and best practices.
Understand the database concepts and write efficient queries; raise clarifications / issues / concerns regarding work output to the lead.
Complete documentation as per the scope; prepare guidelines and checklist for development and testing activities.
Provide feedback to design team; share feedback with developers to check if code is as per requirements.
Highlight any potential risks to the leads.
Proactively highlight any potential risks to the lead; provide support on process audit activities; adhere to process and tools.

Process Improvements and Adherence:
Participate in innovation sessions; implement process improvements to reduce manual intervention (e.g. automation); support on process audit activities.

Generate ideas to provide value-add and share the same with the Technical Lead.
Adhere to process and tools (usage of cognizant 2.0, awareness of Quality Management System, IDE etc.)

People management:
Engage with team; resolve / conflict management within team; conduct internal training for developers within team
