     Received appreciation from Client and project manager several times for outstanding performance

Work Experience

IRIS as Senior Technical Consultant
Nov 2019 to Till Date

Key Result Areas:
     Managing requirement gathering, system analysis and finalization of technical / functional specifications
     Defining best practices for project support and documentation
     Managing smooth implementation and testing of application at client location
     Providing post-implementation, application maintenance and enhancement support to the client with regard to the product / software application
     Cooperating & communicating with other team members for efficient management work
     Managing & providing technical guidance/support to the project team
     Delivering & implementing the projects as per scheduled milestones
     Defining suitable methodology to undertake the project with the available inputs for the requisite output
     Interfacing with clients for business requirement gathering, conducting system analysis and finalizing technical / functional specifications
     Identifying documents related to components and maintaining detailed study of the same as per the product changes, by getting in touch with the product developers

Project Title: Client Visit Management System (CVMS)
Client: IRIS
Technology: Java 8, Spring boot, Hibernate, JDBC, JSP/JS, AJAX
Database: SQL Server 2012
Web/App Server: JBoss EAP 7.1
Designation: Team Member
Description: There are frequent visits of the clients in any MNC premises for official or non-official purpose. Therefore, this had been decided by the management that a software application would be developed that can track each and every activity of the client from his departure from his place till his returning back. The client could simply access the web URL and enter all his details and services he wants to avail, for example, cab facility, meals, milk timings, etc.
This will make the client's stay with the company much more pleasurable and hassle free.
Key Result Areas:
    Daily Stand up meetings and show case demo.
    Coding service layer
    Hibernate classes
    Front-end coding in JSP
    Multithreaded flavor at front-end using AJAX
    Development and developer level testing
    Bug fixing
    Test cases
    Milestones and project delivery

UTIITSL as Sr. Java Developer
Jun 2018 to Nov 2019

Newgen Software as Sr. Software Engineer
Sep 2016 to Jun 2018
