Summary

A technocrat with nearly 5 years of rich experience in managing project/product related operations, managed planning, feasibility studies and configuration for products and services using diverse technologies, tools and frameworks
Insightful knowledge of process analysis & designing with comprehensive experience in technical solution architecting (using Agile/Scrum models) for enterprise wide solutions with alignment of business & information systems
Expertise in managing overall software development lifecycle involving requirement analysis, system study, designing, architecture, testing, programming, coding, de-bugging, defect management & documentation
Merit of being recognised with Round of Applause [Extraordinary Commitment] twice, Several Excellence Contribution Award and Several Winner Circles for achieving key deliverables

Work Experience

⚬ **Wipro** as Senior Software Engineer -Full Stack Development
Feb 2016 to Till Date

Key Result Areas:
Analyzing and mapping user needs and software requirements to determine feasibility of design and evaluate scope of project to provide best solutions
Participating in the team's Agile Software Development Process; developing unit tests and functional/ integration tests as well as supporting production deployments of developed solutions; coordinating in smooth implementation of the project
Preparing high level and detail design documents according to the system requirement specifications
Designing, developing, testing, troubleshooting and debugging the applications; providing post-implementation, application maintenance and enhancement support to the client with regards to the product / software application
Participating in the software development and mapping system requirements to obtain a thorough understanding of business needs in order to deliver accurate solutions
Developing high quality applications in accordance with established company standards & development guidelines
Performing code reviews, unit testing, and system testing as needed; debugging, testing and deploying the software
Reviewing and analyzing the effectiveness and efficiency of existing systems and developing strategies for improving or further leveraging these systems
Providing updates to the Senior Management on work in progress, completed & planned, and issues potentially impacting the on-time completion or quality of work
Communicating with internal clients to determine specific requirements and expectations; managing client expectations as an indicator of quality

KEY PROJECTS
Client: Sigma (Wipro Internal Project)
Period: Jan'20 till date
Role: MEAN/MERN Developer
Working as MEAN/MERN stack developer

Creating different applications based on client requirement in a very short span of time
Gathering requirement from client & developing applications like manager tool, effort monitor and leave balancer

Client: MyTime (Wipro Internal Account)
Period: Sep'17 to Dec'19
Role: Front End Developer
Operated as UI Developer and React Developer for 1 complete application and later managed other applications build on different technologies like Jquery, Angular 2
Worked as Front End Lead, transformed complete application using Angular 6; responsible for every front end related issue; worked with Server Team for configuration of server and security team for Application Architecture
Independently took up the challenging tasks like QR code generation and UI design changes
Interfaced with backend resource for code changes and to understand requirements on different scenarios
Led the documentation of entire flow to present to business
Trained teammates on behavioural skills and organized several team activities

Client: Charles Schwab, Bangalore
Period: Feb'16 to Jun'17
Role: Backend Developer + Technical Support Engineer
Worked as Support + Developer in Client project (Charles Schwab) in two separate project handled by same manager
Attained appreciations for business related interaction with client
Bagged Charles Rookie Techie Award.
Developed Restful Web API using MS SQL and Asp.net; performed UI changes using HTML5 and CSS
Supported DevOps tools like Jira, Vera Code

Education

UG: **B.Sc (Mass Communication and Videography Hons)** from **Aligarh Muslim University (AMU)** in **2015**

PG: **M.Tech (Computer Science)** from **Birla Institute of Technology and Science (BITS), Pilani** in **2019**
