Summary

A committed innovative professional offering 12+ years of a successful career with diverse roles distinguished by commended performance in Robotics Process Automation(UiPath, Kofax Kapow), Devops and Quality Assurance.
Project Execution: Worked in Agile Scrum team. Responsible for end to end implementation of RPA projects, right from creation of Process Design Document (PDD) to moving the Automation Solution to Production.
Management: Good knowledge of managing code base across multiple environments (DEV, QA, and PROD) and implementation of automation pipelines for automation solution deployments.
Ownership: Responsible for implementation of RPA projects with various clients belonging to different geographies.
Awards and Recognition: Achieved Unit level R&R award for contributions to automation, received appreciation from client Microsoft, Wal-Mart, Liberty Mutual Insurance and VGZ for the smooth transition of Automation Solutions.

Work Experience

🔵 **Cognizant Technology Solutions** as Senior Associate -Projects, RPA & DevOps
Oct 2016 to Till Date

Clients: Liberty Mutual Insurance, VGZ and Cognizant Business Accelerator (AI & ML based Automation)
Responsibilities:
Had rich experience of developing and moving 50+ business process automation workflows to Production using RPA tools such as UiPath and Kofax Kapow.
Had good experience of implementing Projects at Client location in Netherlands.
Responsible for creating end-to-end automation solutions for clients as per requirement which involves feasibility study, designing architecture, development, testing and deployment of automation.
Gained exposure for working on Process Definition Document (PDD) step by step keystroke level and Solution Design Document (SDD)
Have driven multiple RPA projects with various clients belonging to different geographies.
Working with client's process subject matter experts, to detail user actions/steps in a process to be configured into RPA tool (Robot).
Monitoring the overall functioning of processes, identifying improvement areas and implementing adequate measures to maximize customer satisfaction level
Bring a level of robotics knowledge to the client and play an important role in identifying and targeting new opportunities with both existing and new clients
Responsible for Analyzing, documenting and reengineering business processes in scope for automation and robotics.
Determines RPA best practices and suggests how to improve current quality processes, standards and practices.
Responsible for providing recommendations on RPA tool selection criteria based on process requirements and policies.
Worked in creation of Change management tickets using tools such as BMC Remedy .
Develop and implement an automated CI/CD DevOps tool set for application life cycle management.
Provided the assistance for the smooth phase of Release for the Emergency and Expedite Releases by getting the Director Level Approval and coordinating with different teams.
Trained on Robotic Process Automation to perform research on next-gen IT Automation needs, prepared prototype for customer introduction.

Leading and driving a team of five specialists for DEV, QA & PROD deployments.

- **Infosys Limited** as Technology Leader
  Dec 2007 to Oct 2016

  Clients: Microsoft and Wal-Mart
  Responsibilities:
  Initiated career with Microsoft RTOS (Windows Embedded Compact) validation on different hardware like CEPC, CEPC_SMP, ARMV5, ARMV6, MIPS, TI, etc.
  Worked in AGILE methodology in scrum team from offshore since Wal-Mart moved to AGILE.
  Preparing infrastructure provision code using Terraform, Amazon Cloud formation and Azure resource templates.
  Preparing configuring management code using Puppet Manifest, Ansible Playbooks and Chef Cookbooks.
  Coordinate and support application builds on Containerized infrastructure like Docker and Kubernetes.
  Coordinate with teams to design the DevOps tooling and process for the application needs.
  Supported tools like GIT, Nexus, SonarQube, Maven, ANT, Jira, Jenkins, ELK stack, Grafana and Prometheus.
  Administered web servers like JBOSS and Apache Tomcat.
  Gathered good knowledge on Linux OS on Centos, Ubuntu and Redhat distros and equipped with Scripting skill set.
  Leading and driving a team of eight specialists (onshore and offshore) for DEV, QA and PROD deployments.

Education

UG: **B.Tech/B.E. (Electrical and Electronics)** from **Jawaharlal Nehru Technological University (JNTU)** in **2007**

IT Skills

Skill Name	Version	Last Used	Experience
Devops, Linux			
GIT, Nexus, SonarQube, Maven			
ANT, Jira, Jenkins, ELK stack			
grafana and prometheus			
JBOSS AND APACHE TOMCAT
