Work Experience

🔘 **Infosys** as Technology Analyst
Jun 2016 to Till Date

Description
My Project is to develop an application which CCPS is product to provide a set of web services sharing information related to Cash at Fund Level such as:
? Settled Cash: This is the cash on hand which needs to be invested for daily returns. Tool to enable active cash management for business across all lines (Retail, Institutional-US and International-Global)
? Trade Date Cash: Timely publishing of trade date cash amount from Back Office to Front Office. Publish Fund Level Shareholder Info as available.
? Projected Cash-Capture and Publish projected cash balances
Technology-Angular8, 9, Angular Material
Responsibilities and Contribution:
We developed the UI Part of the application in Angular for various screen and deliver them and created the entire application from scratch.
Requirement Gathering, Implementation, Deployment & Testing the functional, regression and performance aspects of the new version and work in a true agile fashion.

Capital Straight Through Accounting And Reporting (CSTAR)
25
Location
:
Pune
Description
:

It?s an application to develop, enhance & support an application which manages Portfolio Account of Customer. We use Eagle Application to do that. We work on enhancements of existing functionalities of the jobs by optimizing it.
Technology-C#, LINQ, ASP.NET, Oracle, Linux, Autorep, JIL, Unix, MVC, SQL Server
Responsibilities and Contribution
Enhanced the existing MVC Application to the new requirements which pop in every month
Debugging and fixing the major functionality and UI issues identified by Business in the Major application used by the top management in the organization
Single handily developed automation tools that reduced user effort and enhanced the work flow and saved nearly 20 work hours a sprint for the entire team.
We migrated source code from Perforce to Bitbucket for the various components of CSTAR.
We worked on the migration to v17 version of Eagle, did an analysis of around 293 Panels and created a framework to develop overlays for more than 100 panels.

Focus-Point (Customer Representative facing platform)
9
Location
:
Chennai
Description
Focus point is a launch pad for all the applications which the Phone representatives/ Customer representatives use to serve the customer. Based on the different needs of the customer, representatives launch various applications from Focus Point to serve the customer. It consists of 200+ applications across practices in the Workplace savings. It?s also a repository of the customer interactions which proves very handy during the communication.
Technology-C#, .Net, LINQ, MVVM, WPF
Responsibilities and Contribution
We work on enhancements of existing functionalities of Focus Point to improve UI experience and ease of use.
We implement changes to abide with Financial regulations.
We change Focus Point to accommodate architecture enhancements recommended across organization
We involve ourselves in sun setting few of the legacy/old applications that are incompatible with the latest windows upgrades
Innovate in our daily day to day work to solve the business pain points.
Adding value to the product to improve the customer experience.
I have done interfacing with clients both internal and external to the business to gather requirements, execute tasks, and document all efforts
We implemented a Verification Tray in Angular 4.0 to authenticate the customer by an associate.
