Projects

Project Title: Data hiding in DNA sequence using DNA based steganography
Client: NA
Nature of Employment: Full Time   Duration: Jan 2019 - May 2019
           Onsite / Offsite: Offsite
Project Details: Breaches in Data security is one of the major drawback in the technological world. So in this project we tried to hide import ant data or messages in the DNA chain sequence after converting the message into ASCII format then into a given binary number and then into nucleotide format . As only one gram of DNA can store millions of gigabytes and which will have millions of nucleotide it will be difficult to ex tract the original message for an intruder.
