Summary

Around 9 years of experience in software industry in the areas of analysis, design and development of Web and Windows applications.
Solid work experience in design, development and maintenance of web based applications using ASP.NET, MVC, C#, VB.NET, ADO.NET, Web APIs, REST APIs, .NET CORE.
Hands on into UI technologies like React.js.
Good experience in developing multi layered applications and using design patterns in application designing architecture.
Experienced in Azure Devops which includes CI/CD pipeline, Azure Boards, Azure Artifacts, Azure Repos. Worked in Agile Development Model using Azure Devops.
Good foundation with a strong knowledge of object oriented programming principles and object oriented design.
Self-Motivated with good team attitude, organized and takes keen interest in problem-solving and trouble-shooting challenges.
Excellent communication and interpersonal skills.

Work Experience

🔘 **Larsen & Toubro Infotech Limited** as Project Lead -Dot Net
Jul 2018 to Till Date

Client: OTIS Elevators
Location: Larson & Tourbo Infotech Ltd, Pune, India

Role: Project Lead
Description:
This a project called Customer Portal. It has replaced the old system called eservice. The eservice application was used by all OTIS customers to handle their service requests and manage their accounts and preferences. The new Customer Portal application had UI in React JS and there were 2 layers of APIs created. The UI communicates with Front end API that calls the Backend API which then communicates with the Database.
Responsibilities:
Developed Web APIs in .NET core using C#.
Worked on Report generation logic and sending out emails to users on events.
Root cause analysis of the post production issue and provided a fix for it.
Performed automated and UAT, Integration testing.
Worked on Architecture to design Microservice Architecture.
Used Azure Devops for multiple things in the Project

Environment: Visual Studio 2019, C#, WEB API, React.Js, Azure Devops, TFS, GIT, SQL Server 2014

Role: Project Lead
Description:
This a project call GSS Integration. It is about replacing the old system with new Microsoft Dynamic CRM system. The

project involves creating a middle tier in the .Net for communicating with the legacy systems and the new Microsoft Dynamic CRM system. Project also involves writing the automated test code to ensure complete test coverage.
Responsibilities:
Developed interfaced in C# to invoke the SSIS package
Root cause analysis of the post production issue and provided a fix for it.
Performed automated and UAT, Integration testing.
Worked on SSIS packages

Environment: Visual Studio 2015, C#, Windows Services, SSIS, Microsoft Dynamics CRM, TFS

Fiserv India Pvt Ltd as Technical Analyst
May 2016 to Jun 2018

Client: Insurance companies all over the world
Location: Fiserv, Pune, India
Role: Technical Analyst   Aug 2017 - Jun 2018

Description:
This a product called Lifesuite which is used by insurance companies for handling all the insurance policy related operations of the customer. When a new customer signs up for a policy, the policy can be entered into the system. The automatic rules are triggered on the policy which will notify the underwriter different operation which needs to be performed on this policy. The system communicated with third parties using XML.

Responsibilities:
*   Solved the production issues related to the product.
*   Root cause analysis of the issue and provided a fix for it.
*   Performed unit testing.
*   Developed a utility to ease the development process.
*   Worked on SRS reports to solve the production issues.
*   Did Self-learning on Angular 2

Environment: Visual Studio 2015, C#, Windows Services, Flex, Angular 2, Tortoise SVN.

Client: Lending Banks all over the world
Location: Fiserv, Pune, India
Role: Technical Analyst   May 2016 - Aug 2017

Description:
This was a product called Velocity. This a lending product which handled all the loan requests of the clients. Project involved migrating all the old clients from 2.0 version to new 3.0 version. In older 2.0 version, they were using XSLT for data processing. We have to convert that logic to XML by creating mapping files using a windows utility.

Responsibilities:
*   Worked on converting XSLT logic to XML using a windows utility.
*   Worked on crystal reports to create reports from older version.
*   Solved the production issues.
*   Performed Unit, Regression testing.

Environment: Visual Studio 2013, C#, SQL SERVER 2008, Crystal Reports, TFS.

Infosys as Senior Systems Engineer
Jul 2010 to Jul 2012

Client: Scottish and Southern Energy
Location: Infosys, Pune, India.
Role: Sr. Systems Engineer   July 2010 - July 2012

GIFT System:

Description: The objective of this project was to provide production support and maintenance for a web application in.NET, which is used by the customer care executives to handle daily customer operations and all the transactions in the UK. This was an application with complicated business logic involving Workflows, Web services.

Responsibilities:
*   Developed interface screens using Windows Forms.
*   Supported and maintained a Windows based .NET application for customer care executives.
*   Followed the Incident, Problem, and Change Management procedures to support environment.
*   Maintained application through multiple release cycles including testing, analyzing defects and developing patches.
*   Provided Level 2 Customer Support triage and ticket management for global servers.
*   Maintained and supported Microsoft Team Foundation Server (TFS) for code to be secured in a multi-team environment.
*   Responsible for writing Stored to retrieve the data from the database.
*   Guiding the team members on issue related things.

Environment: Visual Studio 2008, Web Services, Workflows, ADO.NET, C#.NET, SQL SERVER 2008.

Education

UG: **B.Tech/B.E. (Information Technology)** from **Government college of engineering, aurangabad** in **2007**
PG: **MS/M.Sc(Science) (Computer Science)** from **Western Illinois University, Macomb, IL, USA** in **2015**
