## Summary

IT Software professional with around 5 years experience, having served as .NET Developer and client-side web development for various Application development projects in the healthcare domain. Well versed in requirement elicitation, Analysis, BRD's, Development, Unit Testing and deployments.

## Work Experience

**Cognizant** as Associate -Dot Net
Mar 2016 to Till Date

Worked in a team of .NET developers for a fast-paced software development firm. Involved in Design, development, testing and provided maintenance for multiple ASP.NET websites, using C#, MVC, SQL Server, JavaScript and Web API. Achieved 100% client satisfaction and on-time completion.
Worked on different projects following up the Agile and Waterfall methodologies.
Developed test strategies, test plans and test cases and performed unit testing to identify resolve integration, functional and usability issues before deployment.
Developed multiple database objects like stored procedures, triggers, etc.
Interaction with stakeholders to streamline the business processes and come up with new enhancements for existing applications.
Oversaw the entire software development life cycle for ongoing projects & configured existing systems.
Resolved and tracked issues while avoiding escalation.
Perform code reviews and ensure compliance with application quality, coding, UI and Corporate Standards.
Work closely with the functional team to determine the feasibility of requirements and collaborate on design ideas and improvements.
