Work Experience

Square Bridge Technologies Pvt.Ltd as Software Engineer -IT
Dec 2016 to Till Date

PROJECT DETAILS

Position   :   Qliksense Developer
Client   :   Forethought, Houston, TX
Application   :   Forethought Reporting

Forethought Financial Group, Inc. ("Forethought") is a diversified financial services organization dedicated to providing innovative financial solutions for those planning for retirement and end-of-life needs. Headquartered in Houston, with insurance operations in Indiana, Forethought's ongoing success is underpinned by strong financial performance and a proven reputation for honoring its commitments.
We are building up Data ware house on top of that we are generating reports. We have used SSIS for building up data warehouse and Qliksense for reports generation.
Business Benefits:
1. Integrating data from multiple sources;
2. Performing new types of analyses; and
3. Reducing cost to access historical data.

4. Standardizing data across the organization, a "single version of the truth";
5. Improving turnaround time for analysis and reporting;
3. Sharing data and allowing others to easily access data;
4. Supporting ad hoc reporting and inquiry;
5. We are giving access to end users for report manager so that by using report builder users can create there own reports

Responsibilities:

Interacting with clients to gather about the Requirements
Time and resource estimates
Preparation of the BCR, Design specifications and System Requirement documents.
Setting up the QlikSense Stream creation , Folder creation for the project, Data connections, Folder connections
Data extraction from source using Teradata connector and QVD generation.
Data modeling for the Extracted QVD's, creating calendar dimensions, handling custom dates
Dashboard designing using different chart types and tables and various extensions as per client requirement
Unit testing the data between the source and application
Integrating the Qlik visualization objects into salesforce
Application migration to different environments
Production deployment activities
Post deployment Regression testing
Training and support to business users on Qlik functionality as well the application features and functionality and navigations

Environment: SSIS, SQL Server, Qliksense

Position   :   Qliksense Developer
Client   :   Project Sunrise (AXA AUSTRAILIA)
Application   :   Qliksense Reporting

AXA Global is a client-focused financial services leader providing wealth protection, asset management and financial planning strategies to individuals and businesses through a strong family of brands and products. AXA - UK / AUSTRAILIA deals with INSURANCE, SUNLIFE and HEALTH CARE.
Project Objective
    The Objective of this project is to collect the consolidated information from various sources from different locations.

Responsibilities:

Involved in building the data model, creating reports as per client requirement and scheduling the reports.
Implemented 2-Tier architecture specific to particular project as per client guidelines.
Created Qliksense dashboards based on previous Qlikview applications as per client requirement.
Interacting with onsite team to get detail requirements and fulfilling the requirements.
Creating Technical Documents to understand the functionality of applications.
Created Initial Proof of Concept (POC) for the application.
Implementing various Optimization Techniques in our Qlik applications to reduce reload time.
Using Set analysis joins, Link Table, Concatenate, Variables based on situation.
Hands on experience in removing of synthetic keys and circular loops.
Modifying the Existing dashboards/Reports and created new Dashboards.
Implemented multiple Ad-Hoc reports as per client requirement by using Qliksense.
Worked on very tight deadlines and aggressively for the completion of the Project Worked to provide several level of security using section access.
