Abhishek Das ➕ premium ⭐ Featured
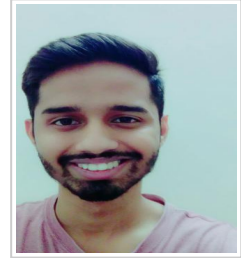

Full Stack Java Developer with 6 years of experience in Banking, Finance, Telecom-OSS and Digital Media domains.

Skill Set: Java EE + Spring + Angular + Web Services + Microservices + Cloudfoundry

Current Designation: **Associate**

Current Company: **JP Morgan Chase**

Current Location: **Hyderabad / Secunderabad**

Pref. Location: **Bengaluru / Bangalore,Delhi / NCR,Hyderabad**

Functional Area: **IT Software - Application Programming / Maintenance**

Role: **Software Developer**

Industry: **IT-Software/Software Services**

Marital Status: **Single/unmarried**

Key Skills: Core Java,Hibernate,Log4j,Java EE,SOAP,WSDL,XML Schema,XSLT,XSD,ESB,Web Services,Rest,JSON,Apache Camel,Spring Framework,Angularjs,Javascript,HTML,Spring

Total Experience: **6 Year(s) 0 Month(s)**

Highest Degree: **B.Tech/B.E. [Electronics/Telecommunication]**

Verified :   **Phone Number |**   **Email - id**

Last Active: **Oct-Dec 2020**   Last Modified: **Oct-Dec 2020**

Summary

I've 5 years of software development experience in distributed enterprise systems of Telecom (OSS/BSS), Digital Media, Banking & Finance domains.
I independently develop and deliver end-to-end (frontend, backend & integration) re-platforming and feature enhancements to a product, which facilitates account opening & management for corporate customers of DBS. This application is currently used by branch officials and relationship managers in Singapore, Hong Kong & India.
Previously, I've worked on a large-scale Telecom BSS Solution implementation project for a world leading satellite communication service provider. I have developed and delivered many mission critical, business oriented, end-to-end features and enhancements to the existing OSS/BSS system, working closely with client and teams across shores.
Also, I've worked on a Digital Media Delivery and Digital Content Management Product. My role was to provide innovative enhancements and solutions to customers using the product.

Work Experience

JP Morgan Chase as Associate
Sep 2019 to Till Date

DBS Bank as Associate
Feb 2017 to Sep 2019

Technologies : Java 8, Angular 4, Java EE, Hibernate, Spring Data, Spring Boot, Spring MVC, Maria DB, MS SQL Server, JSON, GSON, REST, SOAP, Apache Java Libraries, RxJS, RxJava

Currently in role of Dev Lead, have a responsibility of design, development, implementation of one module of customer on-boarding (account opening) product of DBS corporate customers. Major responsibilities :
- Requirement gathering from BA & forming users stories.
- Assigning JIRAs to developers.
- Tracking JIRA progress of all the developers & providing daily status to Project Lead, Project Manager, Product Owner & BA.
- Doing end-to-end design and implementation as per new requirements.
- Responsible for pre-production checks, post launch defect fixing & patches.
- Providing support during production deployment & post deployment verification.

Apart from daily work, I have
- Always tried to maintain healthy work environment & encouraged fellow developers to work.
- Conducted sessions & trained fellow colleagues in emerging technologies.
- Involved in weekend recruitment drives

Accenture as Software Engineering Analyst
Sep 2016 to Feb 2017

Project Details-
Domain   :   Digital Media Broadcasting & Content Management
Environment   :   Java 6, Spring Batch, Hibernate ORM, Microservices, REST

I'm a member of the Centre of Excellence team responsible for providing innovative enhancements and solutions to a
Digital Media Delivery and Digital Content Management Product.

Roles & Responsibilities:
Innovate & design newer features and implement them in the existing system.
Provide ideas for newer PoC which can be implemented in the system.
Take full responsibility of any task assigned and complete which minimal support
Responsible to do any PoC which ever assigned in shortest time possible.

Aricent as Software Engineer
Feb 2014 to Sep 2016

Project Details -
Domain   :   Telecom-networking/OSS/BSS
Client   :   World's leading provider of broadband satellite services and products
Environment   :   Java 6, J2EE, SOA, JTEST, JPA, EJB, SOAP, WSDL & XSD

I have worked on a large-scale Telecom BSS Solution implementation project for a world leading satellite communication
service provider headquartered in USA. It has business over North America, Brazil, Middle East and Myanmar. The O/BSS
system is developed and maintained by Aricent. It's a single platform which provides customer administration, order
management, billing management, user & access management, & service/subscription administration.
Roles and Responsibilities:
- Module level requirement gathering from off-shore team and client for quality code delivery.
- Providing pre-design analysis to the client to check the feasibility of any new feature implementation.
- End-to-End feature delivery which includes all levels of software development starting from pre-requirement phase to
design, coding, unit testing and integration testing.
- Fixing production bugs and providing solutions to critical system bugs.
- Independently working on a specific module and delivering production level code in a prescribed time frame.
- Setting up UT and SIT testbeds.
- Performing manual UT of the prescribed module and SIT of the whole system.
- Making all module related quality documents for QA audit.

Education

UG: **B.Tech/B.E. (Electronics/Telecommunication)** from **KIIT University, Bhuvaneshwar** in **2013**
